PROFESSIONAL SUMMARY

Results-driven DevOps/Site Reliability Engineer with 3+ years of experience designing, automating, and managing cloud infrastructure across AWS and Azure environments. Skilled in Kubernetes (EKS/AKS), Terraform, CI/CD automation, observability, and infrastructure security. Experienced in managing production workloads, scalable cloud-native deployments, monitoring solutions, incident troubleshooting, and operational reliability.

EDUCATION

Charotar University of Science and Technology

Bachelor of Technology in Information Technology; CGPA: 8.65

Anand, Guj

Aug 2021 – May 2024

Uka Tarsadia University

Diploma in Computer Engineering; CGPA: 8.85

Surat, Guj

Aug 2018 – May 2021

CORE SKILLS

Cloud Platforms: AWS, Azure, GCP

Containerization: Docker, Kubernetes, EKS, AKS, Helm

IaC & Automation: Terraform, Ansible, CloudFormation, SaltStack

Scripting: Python, Bash, PowerShell

CI/CD & DevOps: Azure DevOps, Jenkins, GitHub Action, ArgoCD, Linux

Monitoring & Logging: Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor, SOC

Networking & Security: VPC, VNet, Security Groups, Load Balancers, NSGs, IAM, RBAC

EXPERIENCE

Configit

Chennai, TM

Cloud Operations Engineer

Jan 2026 – June 2026

- Provisioned and managed Azure infrastructure using **Terraform, including AKS clusters, VNets, NSGs, Key Vaults, storage accounts, and IAM** configurations.
- Administered production-grade **AKS clusters** hosting 10+ microservices, **managing autoscaling, namespaces, rolling deployments**, and pod-level troubleshooting while supporting production releases and reducing downtime through **PowerShell and Python** automation workflows.
- Built and maintained **Azure DevOps CI/CD pipelines for multi-environment** deployments with automated testing and deployment workflows.
- Developed **Helm charts** and **Kubernetes** manifests for containerized workloads and managed Docker image deployments through Azure Container Registry (ACR).
- Implemented **Python-based** automation scripts for **infrastructure and operational tasks**, improving deployment and maintenance workflows.
- Implemented observability using **Grafana, Prometheus and Azure Monitor** with dashboards, alerting, log analytics, and production monitoring.

Crest Data Systems

Ahmedabad, Guj

Site Reliability Engineer

Nov 2023 – Jan 2026

- Architected and deployed scalable, secure infrastructure using **AWS services, Docker Compose, Python, and Let's Encrypt SSL/TLS** across environmentW.
- Optimized infrastructure for performance, reliability, and cost efficiency while managing monitoring, security, and infrastructure maintenance.
- Managed multiple client-facing production deployments and reduced downtime through **PowerShell** and **Python-based** automation workflows while participating in **24/7** on-call support rotations.
- Automated AWS Marketplace subscription processes using **CloudFormation, STS, Route 53, Lambda, API Gateway, S3, and DynamoDB**, enabling seamless customer onboarding.
- Leveraged **Elasticsearch, Kibana, Prometheus and Nagios** for centralized monitoring and rapid incident resolution across environments.

TECHNICAL PROJECTS

Cloud Monitoring Python App using AWS

AWS, Docker, HTML, Flask

- Designed and developed a cloud monitoring Python application and containerized the application using Docker.
- Managed container images using Amazon Elastic Container Registry (ECR) and implemented cloud deployment workflows.

Building a QR Code Serverless Application Using Terraform

AWS, Terraform, Python

- Designed and developed a serverless QR code generator using AWS Lambda, API Gateway, S3, and Python.
- Provisioned AWS infrastructure using Terraform and automated application infrastructure deployment using Infrastructure as Code.

Simplifying Kubernetes Management with Portainer

EKS, Kubernetes, Portainer, GitOps

- Deployed a full microservice-based URL shortener application on Amazon EKS and managed the cluster using Portainer.
- Implemented GitOps-based deployment workflows, centralized cluster management, troubleshooting, and application monitoring.
- Simplified Kubernetes operations including deployments, scaling, container management, and service observability through Portainer.

CERTIFICATES

- Microsoft Certified: Azure Fundamentals
- AWS Certified Cloud Practitioner
- Google Associate Cloud Engineer Certification

ACTIVITY

- Core Team Member of CloudOps Community
- Student Volunteer of NSS Team
